The Science of food

is about to change you, your diet and your life

Scientists are now describing the variation in humans and finding - ***oh what a surprise*** - we are different. A new cottage industry is now appearing of tools that can measure us and provide increasingly accurate estimates of our health. Scientists are measuring humans in their entirety and finding - ***oh what a shock*** - we are full of microorganisms! A new industry is emerging to provide foods that selectively feed our 'minions'. Scientists are now analyzing how we acquire knowledge and finding - ***oh what a puzzle*** - we don't learn the same. Education is poised to provide curricula that guide students in learning about themselves so that they can take charge of their own lifelong health.

Dr. Bruce German
Director
Foods For Health @ UCD

Jan. 16 (Wed) • 6 - 8 pm • Pence Art Gallery • Davis, CA

About the Series

This **FREE** public lecture series is intended to familiarize a general audience with science that is meaningful to our daily lives. The presenters are UC Davis scientists who are excited to share with you the science that fascinates them. Seating is limited. Doors open at 6pm. Following the lecture, there will be ample time for discussions with the scientists, while enjoying light refreshments.
